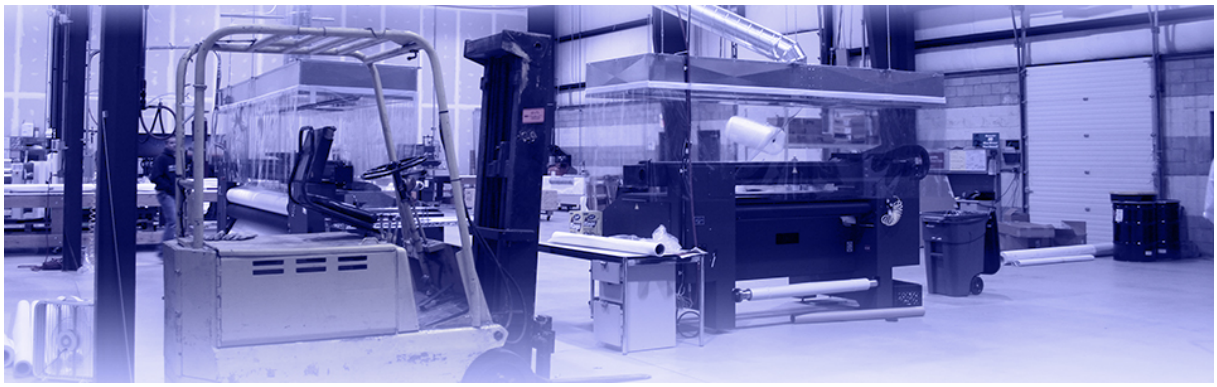
Manufacture of display innovation



15 YEARS EXPERIENCE

We have been producing projection films, and manufacturing a wide range of products for over a decade.

ONE-STOP SHOPPING

We offer more than our own manufactured product-lines. We offer the help needed to make your project a success.

24-7 SUPPORT

Our technical and sale support are always standby to offer assistance. We also have a **48 hrs lead-time.**

NEW DEVELOPMENTS

Projection films up to 2m. width
Projection films for short throw projectors of all brands.
New materials for all kinds of Holographic projection specially large size projection. Save money with re-usable projection films.

INNOVATION

Glimm screens is the only manufacture who is capable of creating projection films capable of supporting ultra short throw projectors. This technique makes it is possible to create a projection under an angle of more than 60 degrees on our films.

PARTNERSHIPS

Glimm screens is one of the top three projection film manufacturers in the world. With over 20 years experience in visual technology combined with our one stop shopping solution we offer a wide range of visual products

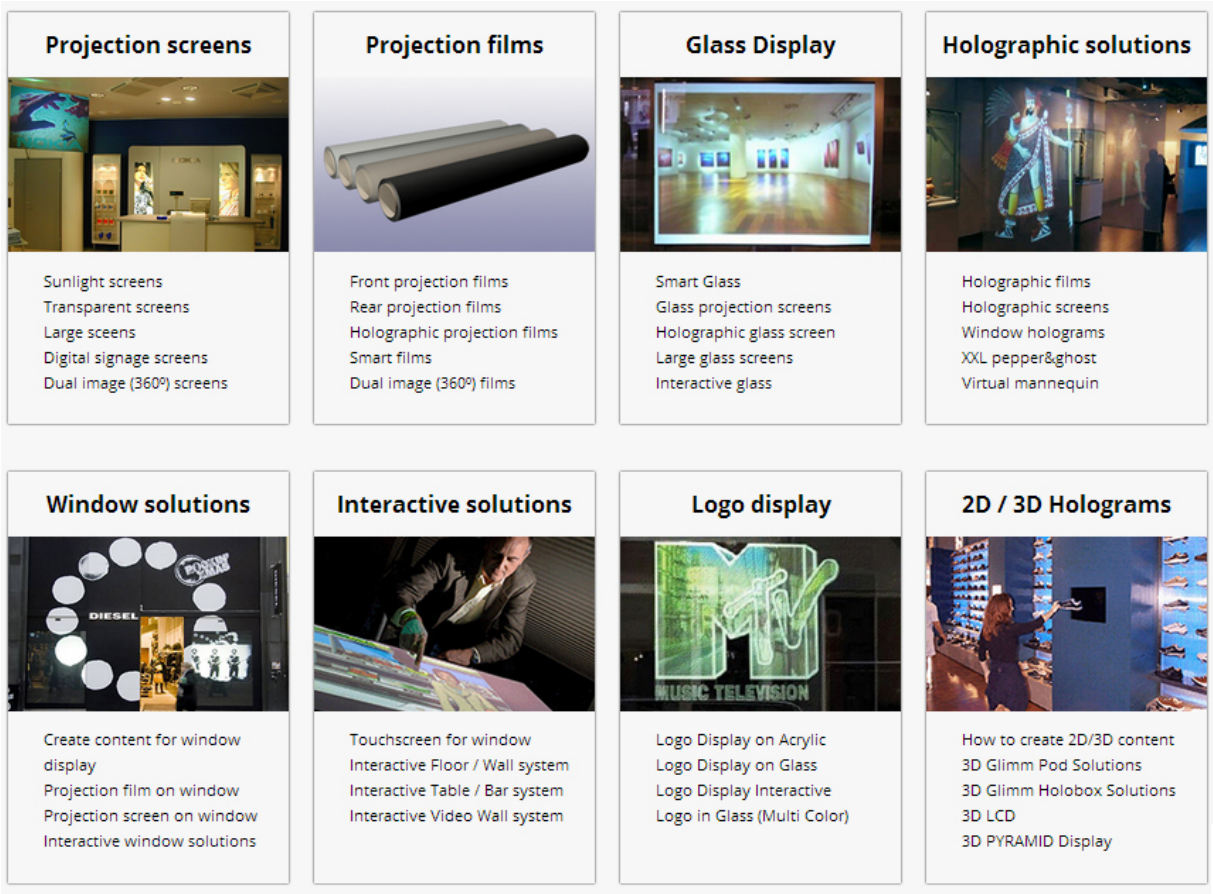
Glimm's product range



About Glimm

Glimm screens started in 2000 with selling the first projection film from 3M. During this period we discovered that technology what was necessary to produce their own projection films. We found a film supplier who was developing films for different applications for 3M and other manufactures like Texas instruments, Samsung. Our own production line started in 2001. Our films are registered, patented and licensed for the global market.

The films are evaluated every year on quality and comparison and needs in the global projection market, this way we can guaranty top quality products, and as the only manufacturer of projection films in the global market offer them for concurring prices.

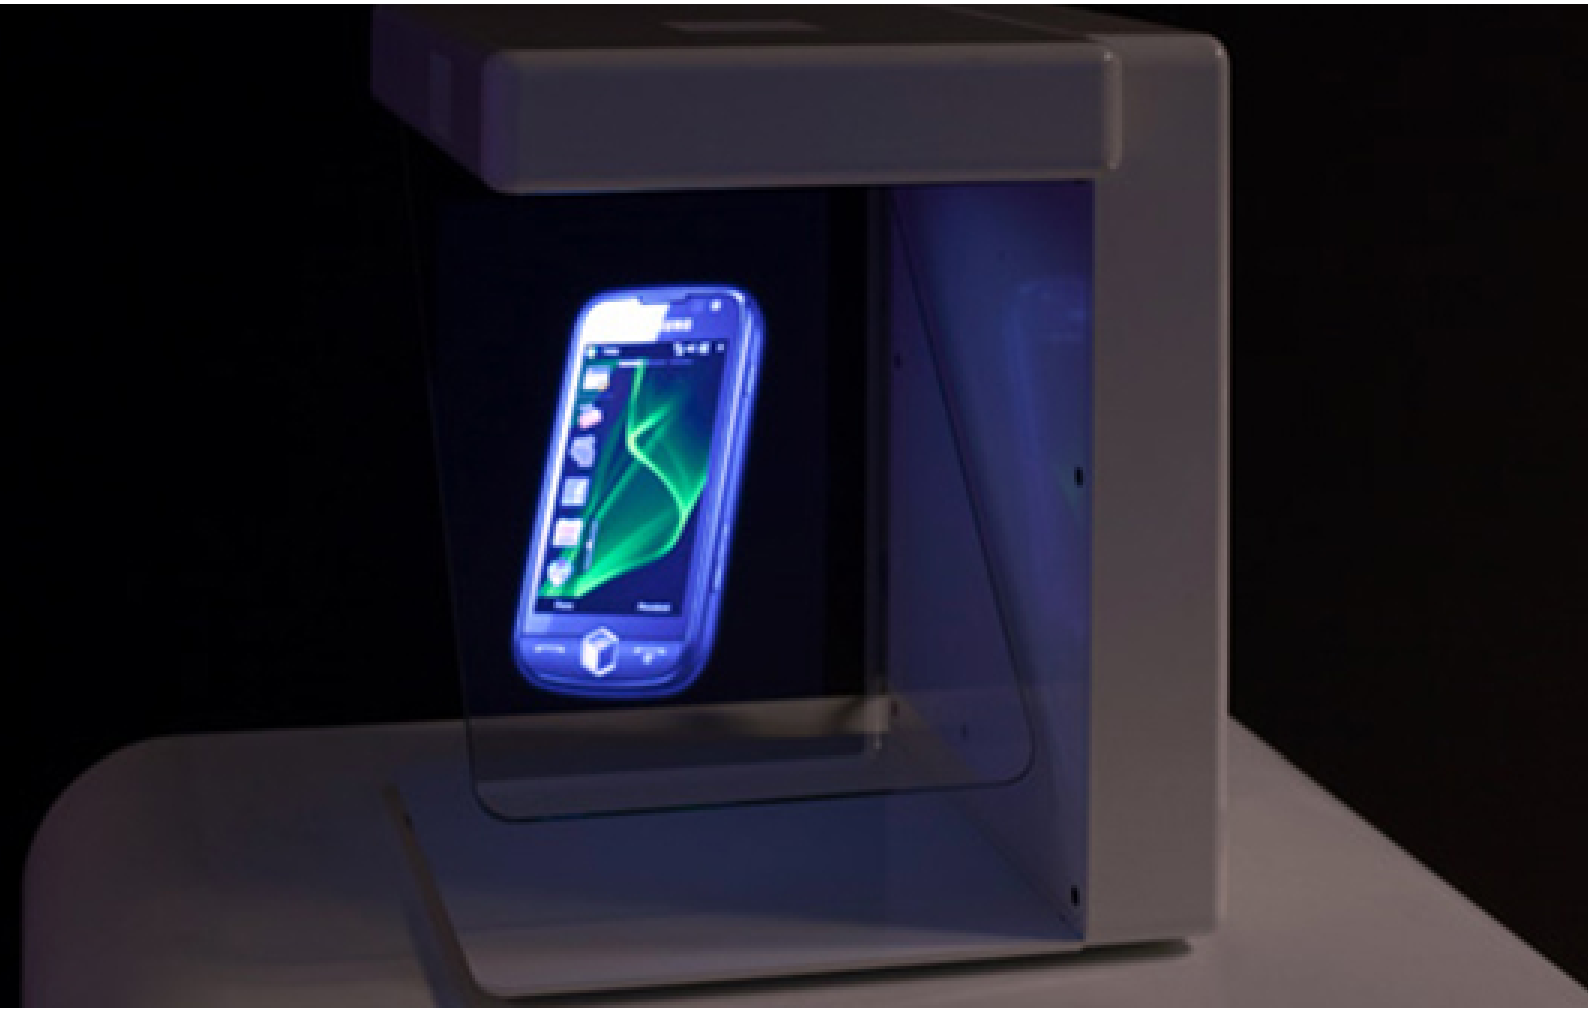
GLIMM 2D & 3D SOLUTIONS™



TRANSPARENT LCD

Transparent LCD system is the newest and most attractive way to display your products.

GLIMMPOD

Product display with 3D images popping out to your customers.

HOLOBOX

An elegant holographic box to display objects floating in the air.

VIRTUAL MANNEQUIN

Provide guests with information, directions and general information without the need of a real employee.

3D LCD SYSTEM

Show three-dimensional images instantly, without requiring specific eyewear.

3D PYRAMID

Mix reality by combining products with free floating holographic video elements.

Glimm Screens B.V. | Vriezerweg 20b| 9482 TB Tynaarlo | The Netherlands | E-mail: sales@glimm.nl
Tel: (+31)(0)50-5893112 | Fax: (+31)(0)50-5893113 | Internet: www.glimmscreensinternational.com

3D LCD DISPLAY™

3D Without glasses

Glimm's 3D LCD DISPLAY™ show three-dimensional images instantly, without requiring specific eyewear. The sensation of depth is natural and immediate: it amazes, captivates the audience and retains their attention.

Out-of-Home communication can now use the striking impact of 3D, whether for digital signage, advertising, marketing or special events. 3D also enhances the understanding of complex data and professional imaging can now benefit from the same technology.

3D LCD DISPLAYS

Unlike 3D films made for the cinema or stereoscopic televisions operating with glasses, Glimm 3D screens require proprietary content combining not just 2, but 8 discrete images. Viewers may stand freely in front of the display and move sideways to enjoy the 3D scene from slightly different angles.

No 3D glasses required!

VIRTUAL MANNEQUIN™

Interactive virtual mannequin

Virtual mannequins are an ideal, interactive display to inform customers, visitors and guest. Whether promoting special offers, in-store promotions or being used as entertainment at special events, the multilingual virtual mannequin is the ideal medium to deliver your message.

Car promotion mannequin example

Key Benefits

- ✓ Ensure a consistent message is delivered to your audience.
- ✓ Improve customer service
- ✓ Re-deploy headcount
- ✓ Grab the attention of passers-by
- ✓ Enhance the consumer/shopping experience
- ✓ Create a point of differentiation vs. your competitors

Event market promotion example

Our rear projection film creates the virtual mannequin

The virtual mannequin is a real eye catcher and can be made interactive by connecting to a touch screen panel and that way, provide information upon request. Whether you wish the virtual mannequin to provide guests with a welcome, help give directions or provide more general information. The virtual mannequin can do it all, whilst entertaining the people.

GLIMM HOLOBOX™

Holographic Display

The Glimm HoloBox™ is the first holographic box to display objects floating in the air. When looking at the HoloBox™ you can look straight through the box and you will see nothing else but the 3D content floating in the air.

Interactive 2D/3D objects

This unique effect of objects hanging in the air makes the content and its message well remembered by the audience. This way of promoting information through 3D holographic presentation is a great replacement for common, old-fashioned advertising techniques to create an unique brand awareness.
